Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group II, i.e. claims 20 -34 in the reply filed on 10/25/04 is acknowledged.

Claims 20 – 34 are directed to a method of fabricating a moisture barrier and a method of fabricating a microelectronic package.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 20 – 22, 25-26, 29-34 are rejected under 35 U.S.C. 102(a) as being anticipated by Agarwala et al.

Agarwala et al., discloses an edge seal around the periphery of an integrated circuit device. A substrate 10 is provided. Dielectric layers 12, 14, 16 are provided on the substrate. Via studs 40 form a barrier structure and are formed in vias through the dielectric layers and on the dielectric layers to provide an edge seal. Figure 3F shows that additional layers of dielectric material may be formed on top of the metal stud 40. A second barrier structure may be repeated extending through the additional layers of dielectric material.

Allowable Subject Matter

Claims 23 – 24 and 27 – 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art, including Agarwala et al. does not disclose the depositing, patterning and plating of a seed layer of the dielectric material.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy K Potter whose telephone number is 571 272 1842.

The examiner can normally be reached on M-F.
